Art Unit: 2426

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Rodack on 06/30/2010. The intent of the amendment is to more clearly clarify the invention.

The application has been amended as follows:

Claim 1

A method for providing video content via a television, comprising the steps of:  
providing a user with a menu that includes a plurality of options corresponding to respective control settings for controlling functionality of a channel navigation key, wherein the menu is displayed via the television;  
receiving a first user input corresponding to one of the plurality of options that is configured to a **first conditional** terminate provision of an interactive program guide (IPG) having a plurality of television program listings;  
providing the IPG;  
receiving a second **conditional** user input corresponding to the channel navigation key;  
and  
responsive to receiving the second **conditional** user input and responsive to having previously received the first **conditional** user input:  
terminating providing of the IPG; and  
providing a video presentation.

Claim 3

A method for providing video content via a television, comprising the steps of:  
providing a user with a menu that includes a plurality of options corresponding to respective control settings for controlling functionality of numeral input keys, wherein the menu is displayed via the television;

Art Unit: 2426

receiving a first user input corresponding to one of the plurality of options that is configured to a **first conditional** terminate provision of an interactive program guide (IPG) having a plurality of television program listings;

providing the IPG;

receiving a second **conditional** user input corresponding to at least one of the numeral input keys; and

responsive to receiving the second **conditional** user input and responsive to having previously received the first **conditional** user input:

terminating provision of the IPG; and

providing a video presentation.

Claim 5

A television set-top terminal (STT) configured to output video signals to a television, the STT comprising:

at least one tuner configured to receive video signals corresponding to video presentations;

memory having stored therein program code; and

at least one processor that is programmed by the program code to enable the STT to:

provide a user with a menu that includes a plurality of options corresponding to respective control settings for controlling functionality of a channel navigation key, wherein the menu is displayed via the television;

receive a first user input corresponding to one of the plurality of options that is configured to a **first conditional** terminate provision of an interactive program guide (IPG) having a plurality of television program listings;

provide the IPG;

receive a second **conditional** user input corresponding to the channel navigation key;

and

Art Unit: 2426

responsive to receiving the second **conditional** user input and responsive to having previously received the first **conditional** user input:  
terminate provision of the IPG; and  
provide a video presentation.

Claim 7

A television set-top terminal (STT) configured to output video signals to a television, the STT comprising:

at least one tuner configured to receive video signals corresponding to video presentations;

memory having stored therein program code; and

at least one processor that is programmed by the program code to enable the STT to:  
provide a user with a menu that includes a plurality of options corresponding to respective control setting for controlling functionality of numeral input keys, wherein the menu is displayed via the television;

receive a first user input corresponding to one of the plurality of options that is configured to a **first conditional** terminate provision of an interactive program guide (IPG) having a plurality of television program listings;

provide the IPG;

receive a second **conditional** user input corresponding to at least one of the numeral input keys; and

responsive to receiving the second **conditional** user input and responsive to having previously received the first **conditional** user input:

terminate provision of the IPG; and

provide a video presentation.

***Reason for Allowance***

2. The following is an examiner's statement of reasons for allowance: claims 1-8 are considered allowable since when reading the claims in light of the specification, as per MPEP § 2111.01, In re Donaldson Co., Inc., 29 USPQ 2d 1845, 1850 (Fed. Cir. 1994), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claim 1, inter alia, "a method for providing video content via a television, comprising the steps of:

providing a user with a menu that includes a plurality of options corresponding to respective control settings for controlling functionality of a channel navigation key, wherein the menu is displayed via the television (FIG.4);

receiving a first user input corresponding to one of the plurality of options that is configured to a first conditional terminate provision of an interactive program guide (IPG) having a plurality of television program listings (FIG.5); providing the IPG; receiving a second conditional user input corresponding to the channel navigation key (FIG.4; after selecting exit IPG option from the menu); and

responsive to receiving the second conditional user input and responsive to having previously received the first conditional user input: terminating providing of the IPG; and providing a video presentation (page 12 lines 14-18 of specification).

The closest prior art of US 6,177,931 to Alexander teaches unlock/lock function in a electronic program guide (FIG.4) such that the reduced video screen (12) in the electronic program guide will display the highlighted program when a user browses through the program guide after the unlock feature is selected; and exit the program guide with a select key or cancel button (Col 3 line 63 - Col 4 line 27).

Inter alia, Alexander does not specifically teach the claimed features of "receiving a first user input corresponding to one of the plurality of options that is configured to a first conditional terminate provision of an IPG; providing the IPG; receiving a second conditional user input corresponding to the channel navigation key; and responsive to receiving the second conditional user input and responsive to having previously received the first conditional user input, terminating providing of the IPG".

Art Unit: 2426

2. Independent Claims 3, 5 and 7 are also allowable for the similar features as in Claim 1.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
